

# a360inc announces new solutions-centric website, brings services into unified, comprehensive brand

**FOR IMMEDIATE RELEASE—TUESDAY, JULY 10, 2018**

**[DALLAS, TX]** Today a360inc announces the launch of the organization's new website, a360inc.com. The all-new, solutions-centric website is now the online home for well-known default servicing industry brands including CaseAware, the industry's most prominent case management software system for creditors rights' law firms, and Firm Solutions, the industry's leading practice management, outsourcing, and consulting services provider.

CaseAware and its parent company KMCIS were acquired by a360inc in September 2017. Firm Solutions was acquired in 2016, the same year a360inc purchased C2C Title, rounding out the employee-owned company's suite of law firm practice management, outsourcing, technology, title, consulting, and compliance solutions utilized today by over 250 leading creditors rights' law firms.

"Since our formation as an Employee Owned Company in January 2017, a360inc has been intensely focused on the execution of our strategy to become the industry's premier technology and outsourcing provider for law firms and their business partners. The recent consolidation of our brands and go-to-market initiatives under the a360 banner ([www.a360inc.com](http://www.a360inc.com)) is a major milestone for the group and further refines how our clients, markets and business partners view and understand our value proposition. Through our acquisitions over the last few years, we have built a meaningful suite of solutions in the technology, outsourcing (LBPO), title search, compliance, and general consulting arenas." said Chief Executive Officer Scott Brinkley.

Brinkley continued, "If a law firm's focus is to optimize their operational model, reducing costs through best-in-class software and technology delivery as well as outsourcing solutions, the suite of services provided by a360inc is a great place to start that journey!"

CaseAware and Firm Solutions support protocols for existing clients remain unchanged by the website move. "For our existing clients, this simply means that you can now see the bigger picture and share in the vision," said Chief Operating Officer Jan Duke. Duke added, "Our focus on service will only be supported by having all of our tools to build your business and improve efficiencies in one place now."
