

CaseAware Manage

**The standard features you want
with the customizations you need.**

Standard features include:

- **Resource Optimization**—built-in dynamic load balancing of tasks
- **Clear Communications**—messaging system between users with alerts and calendars for both case and company activities
- **Smooth Accounting**—invoice and check requests, generations and printing

And for your unique needs:

- Configurable workflow management to drive timelines
- User-defined case types, steps, values and flex fields with list options
- Built-in fees and costs forecasting
- Document templates generated from and stored directly in the system

CaseAware Mobile

CaseAware Mobile enables you to securely access critical case information anytime, anywhere with real-time visibility into file status. The mobile app allows for more than just viewing a case history. With CaseAware mobile you can also add notes or snap a picture of a document and save it directly into the file from the convenience of your Apple or Android device.

“ THE MOBILE APP

.....
allows us to review information about clients matters while out of the office and offers easy access to update the system.

CaseAware Integrate

CaseAware Integrate is a maintenance-free program for you to exchange data with the industry's various external systems, no programming required. Are you ready to plug in and get the most from your case management system?
