

## 4 CaseAware Integration Transactions your firm needs to transform your practice

Have integration compatibility but you're only using it for status reporting to your client? Don't stop there!

Integration doesn't have to be for the sake translating your work to your client's platforms. CaseAware Integrate (CAI) is the technological solution to allow our industry's ecosystem to effectively communicate with various applications and industry partners. CAI allows you to optimize your business processes, reduce your cost and expedite timeline cycles. However, these benefits are all contingent with implementing the right integration with the right partner.

Too often, our law firms are overly consumed with daily challenges of trying to turn a profit instead of focusing on building the business or practicing law. If you're a master chef, you shouldn't spend all of your time clearing tables. For this feature update, we've selected 4 strategic vendor-partners that help firm's transform their practice with their value-added services and leveraging CAI to streamline the process.

We've done your homework for you—read about our 4 vendor-partners with services every law firm needs, ROI Evaluation, Value Add Analysis and Steps to Implement.

- Pre-Foreclosure two owner reports with all supporting documents and up to 3 updates at a fixed price by state
- Current Owner (O&E Report)
- TSG Products
- Heir Searches
- Tax Certifications
- 30 Year Search (FHA)
- Full Title Search for Owners Title
- Insurance
- Title Updates
- Additional services such as Signing, Closing, Curative, Disbursement and other related services available

Two-way integration through which firm is delivered a product with supporting documentation, invoice and case level data. Also, First Title's products are provided inclusive of copy costs and a minimum of \$30k of E&O coverage for every property information product.

### Cost Savings/ROI:

First Title's two-way integration delivers data directly to the firm's platform, removing the need for manual data entry. This saves hours of time and staff resources on each transaction, all while improving accuracy by eliminating costly data errors resulting from re-keying. The integration automation saves an **average of 1.5 hours** of labor on each file.

## QUANDIS

- ADR—Attorney Data Reporting to Freddie Mac, includes: Case Creation, Milestone Management (Completion/Reprojection), Messages, Document Upload and Case Updates
- QMS—Quandis Military Search. Search DMDC directly for Active Duty Status. Extra functionality includes: Name Permutation, SSN Look up and image features (i.e. redaction, screenshots, etc.) and monitoring
- QBS—Quandis Bankruptcy Search. Search Pacer national and regional sites real-time with ability to evaluate BK status. This integration searches dockets, documents and regional cases returning PDF images for all searches.

All service offerings have an advanced "rules engine" allowing you to customize your transaction and leverage Quandis' value added features based on clients' business rules. Also, Quandis is a top technology provider in the Mortgage and Default space and as such they understand the compliance demands of their clients and what is expected as a deliverable.

### Cost Savings/ROI:

Cost savings vary based on transaction and volume but overall, we've been able to measure that integrated firms can eliminate FTE labor costs associated with each of the transactions. The manual search process can add up to several hours and even teams of FTEs. QBS/QMS can do in seconds what would take humans hours to perform. In a recent case study, we've concluded that our firms can recognize **90% cost savings** by leveraging the QBS/QMS automation. Also, firms that have implemented the ADR reporting have increased accuracy and faster expense recovery from servicers.
